

## asknet AG - Management Team

### **Michael Scheib | Chief Executive Officer (CEO)**

As CEO, Michael Scheib is responsible for asknet's strategic direction, holdings, sales, marketing, and communications.

Michael Scheib brings to asknet more than 25 years of management experience with different American IT companies. Before joining asknet he served as president and CEO of iET Solutions LLC, a global provider of software solutions for the IT service management market. Prior to iET Solutions, he was senior vice president and general manager of operations for Europe, the Middle East, and Africa (EMEA) with Niku Corp. Before joining Niku, he was executive officer and vice president of European operations for Applix Inc., responsible for overseeing strategic direction and growth of all Applix business lines in the EMEA region. Previously he served in further management roles as managing director for Applix GmbH, Parametric Technology GmbH and as sales manager for CalComp GmbH.

### **Michael Konrad | CFO**

Michael Konrad joined asknet AG in June 2003. He is responsible for Finance, Human Resources, Customer Services and Business Operations.

After studying for the degree of industrial engineer at the Karlsruhe University of Applied Sciences, he began his career as a business analyst with Du Pont Chemicals. After transferring to the pharmaceutical industry and joining the US Allergan Group he worked as a financial analyst for their Pharmaceutical Department Central Europe. From 1999 to 2002 Michael Konrad was Head of Accounting and Controlling at entory AG, an IT subsidiary of Deutsche Börse AG.

**Dr. Dietmar Waudig | Founder & COO**

Dr. Dietmar Waudig is one of the founders of asknet AG. He is in charge of the following areas: Professional Services, Product Development and Technology.

Dietmar Waudig has 21 years of professional experience in the IT and software industry. After studying computer sciences at Karlsruhe University, he began his career with IBM Germany. In the following years he held leading positions at the EDP Center of Karlsruhe University as well as with IBM Germany, where he was responsible for managing large projects at, among others, the European Networking Center in Heidelberg and the Development Laboratory in Böblingen.
